

## chroma+scan Product Release Notice

Posted on February 5, 2014

Dear chroma+scan User,

This notice is to inform you about the release of the B series of the chroma+scan 20x5 and 2125 sensors. Cameras and internal hardware components have been upgraded for improved reliability. The B series sensors and station require firmware 4.11.6.2, but are fully compatible with existing sensors of this family with previous firmware version 4.11.5.4.

Starting February 5, 2014 all chroma+scan 20x5 and 2125 will ship as the B series with the 4.11.6.2 firmware already installed. In addition, all chroma+scan 20x5 and 2125 sent to LMI on RMA will be upgraded to the B series.
